

Description for Datacard 18: Organic and Inorganic Chemicals
Total Names for This Data Card: 290175

Publishers Introduction

This base includes research and development senior chief executives and their management teams producing basic chemicals manufacturing products by predominantly chemical processes. The establishments manufacture four general classes of products:-

1. basic chemicals such as acids, alkalies, salts and organic chemicals.
2. chemical products to be used in further manufacture such as synthetic fibres, plastic materials and pigments.
3. finished chemical products to be used for ultimate consumption such as drugs, cosmetics and soaps, or to be used as materials in other industries such as paints, fertilisers and explosives.
4. Establishments primarily engaged in petrol refining, manufacturing and compounding lubricating oils and greases.

Inorganics – research chemicals and their management teams concerned with the properties and reactions of the elements and of compounds that do not contain chains or rings of carbon atoms such as alkalies, inorganic pigments, industrial inorganic chemicals – see Work Area 28 SIC classifications.

Organic – research chemist engineers and their management teams concerned with the study and manufacture of components that contain chains or rings of carbon atoms such as acrylic and nylon, drugs for pharmaceutical products, diagnostics substances, biological products, soap and detergents, cosmetics, paints, industrial organic chemicals, dyes and organic pigments.

Agricultural – chemical engineers and their management teams manufacturing compounds such as nitrogenous fertilisers, pesticides, explosives, printing links – see Work Area 28 SIC classifications.

Petroleum Refining – Chemical engineers and their management teams manufacturing and processing petroleum, asphalt paving, mixtures and blocks, lubricating oils, petroleum and coal – see Work Area 29 SIC classifications.

Rubber and Plastics Products – chemists and their senior management teams engaged in the production of tyres and inner tubes, rubber and plastic footwear, hose belting and extruded rubber and plastic products, plastic film, laminated plastic, plastic pipe, plastic form and products – see Work Area 30 for SIC classification.

Leather and Leather Products – engineers and their management teams manufacturing such products as leather tanning and finishing, leather footwear, luggage, handbags and personal leather effects – see Work Area 31 for SIC classification

Selection Available – work area, work place, work type, establishment size, gender income geographical by country and postcode, telephone, fax, email.

Source of Data – associations, institutes, journal publications, questionnaires, campaign response, strategic research, government registration.

Updating – continuous against source information, campaign response, goneaways, new names checked and suppressed against the Frankform ANDS system. Users are fully covered by our Guarantee and EC Data Protection Licence.
